## CLEAN SLATE

As of late, cellulite treatment has been all the rage. Consider the crème de la crème procedure EMTONE, which raises the bar by way of being the first treatment to apply radio frequency and targeted pressure energy simultaneously. This revolutionary combination allows the treatment to address all major contributing factors of cellulite, making it the first and only effective solution for cellulite without any downtime. A first of its kind, non-invasive treatment to improve the appearance of dimpling on the skin, EMTONE seamlessly raises the bar in contemporary aesthetics by being a unique, trailblazing device that instantly increases collagen production and elastin to effectively smooth the appearance of dimpling for a natural, lit-from-within glow that will last long after the summer is over.

**THE EMTONE TREATMENT**  
is available at Dr. Frank's New York practice with prices starting at \$1,000.

## DOCTOR'S ORDERS

Fine lines, age and sun spots and discoloration, beware—CoolPeel is the latest treatment to come from Dr. Paul Jarrod Frank. The uber-successful cosmetic dermatologist has perfected a limited downtime superficial laser peel treatment that targets fine lines and sun spots and improves skin tone on the face, neck and décolletage. Compared to traditional lasers, CoolPeel is a much quicker treatment with significantly less downtime that delivers H-pulse – a “high-peak power in extremely short pulses for an ablative treatment without creating thermal damage within the surrounding healthy tissue.” A 5-10 minute procedure, CoolPeel is a highly-controlled system that instantly delivers premiere results.

**THE COOLPEEL TREATMENT**  
is available at Dr. Frank's New York practice with prices starting at \$850.
